

ALL HANDS ON DECK: ENGINEERING A GREEN AND RESILIENT MARITIME FUTURE

Max: 20
[for students]

The maritime sector is undergoing rapid transformation driven by climate change, decarbonisation imperatives, and technological advancements. Organised by the Maritime Engineering Technical Committee and Civil & Structural Technical Committee alongside MPA, "All Hands on Deck: Engineering a Green and Resilient Maritime Future" brings together industry leaders, policymakers, engineers, and researchers to explore Singapore's port transformation journey. The seminar will highlight critical strategies in coastal protection and climate resilience, initiatives for strengthening engineering talent pipelines, and cutting-edge advancements in digitalisation, artificial intelligence, digital twins, and automated port operations.

Please note: Due to venue capacity, this seminar is limited to 20 students only.

Friday, 9.00am - 4.30pm

**Ballroom 1 & 2
