

NTU SATELLITE RESEARCH CENTRE

PIONEERING SINGAPORE'S SPACE ENGINEERING & INNOVATION

Max: 36

As the birthplace of Singapore's satellite technology since 1996, Nanyang Technological University's Satellite Research Centre (SaRC) has successfully designed, built, and operated 13 satellites - ranging from compact 1U CubeSats to advanced micro-satellites over 100 kg. Managed by a 24/7 automated mission control center, SaRC drives cutting-edge interdisciplinary research in areas such as AI, quantum sensing, SAR, and space materials, while empowering the next generation of engineers through hands-on, real-world satellite development programs.

Please note: Due to venue capacity, this visit is limited to 40 participants only.
Pick-up & Drop-off point: Jurong East MRT Station

Thursday, 2.00pm - 4.00pm
